OUR FARMS

Our farm in Gujarat where our journey for BARHI began. Dates are grown with patience and care, allowed to ripen at their own pace. From their early, golden freshness to their softer, fuller character, every stage is guided by time, attention, and respect for the fruit. Planted over 9000 trees 10 years ago.

BARHEE DATES

Soft and golden, Barhee dates are best appreciated when consumed fresh. At this stage, they possess a subtly sweet flavor complemented by a gentle crispness, offering a refreshing experience.
